

Homework week ending 30th September 2022

Maths

The children have been adding a single digit number to a 2 digit number.

We started with numbers where the total of the ones digit was less than 10

e.g. $34 + 5$ $56 + 3$ $22 + 6$

Then we moved on to crossing the tens boundary

e.g. $47 + 5$ $56 + 9$ $78 + 4$

The children have learned to record these calculations using a blank number line.

45 + 6

67 + 8

Recording in this way helps to reinforce a mental image of calculating in this way. Please help your child to record the following calculations on the back of the sheet they have been given. Then, see if they can use this method mentally to calculate the answers to the questions printed on the front of the sheet.

$79 + 6 =$ $38 + 7 =$ $44 + 8 =$ $87 + 8 =$ $36 + 6 =$ $24 + 9 =$

Reading

Please continue to read regularly with your child. We were thrilled by the number of children returning their red reading record book on Thursday and telling us about the book they had been reading.

Thank you for your support.

The children will be encouraged to use **inverted commas when writing speech** for their characters. Please help your child to identify the speech punctuation as you read and as they read to you each evening.

Spelling

Last week the children were learning to spell words with **ge** and **dge** at the end of words. Please see if your child can remember which ones have ge and which ones have dge.

Science

We have been naming bones in the human skeleton and trying to use their scientific names e.g. vertebra (instead of spine or backbone). If you can play the 'Simon says' game using names of bones, it would be a fun way of reinforcing your child's learning. Here is some vocabulary to help you:

skull (protects the brain)

ribcage (protects heart, lungs etc)

femur (long thigh bone, the longest and heaviest bone in our body)

tibia (shin bone)

humerus (upper arm bone)

Mental Health

Enjoy some outdoor time together over the weekend. Children, as you know, love putting on wellies and stomping through leaves or splashing in puddles, so get outdoors and enjoy the start of autumn or even the mud together. Collect conkers and bring them into class for our RE display. Have fun!
